Yetman, George E., Professor Hort., Massachusetts

School fires endanger the lives of students, disrupt school programs and cause heavy property losses each year. Even with our ultra-modern school structures, fire hazards can be found in many buildings. Assigned responsibility, if carried through, can do much to eliminate these conditions and make our school buildings safer. These and other situations afford F.F.A. chapter members an excellent opportunity to help make their schools safer through organized group activities.

Organization

F.F.A. chapter members meet with high school principal and other school officials and discuss school safety. Get approval of principal and other school officials for the F. F. A. chapter to carry out safety activities at school. At the next regular F. F. A. meeting start making plans for your school safety program. The chapter members select a fire warden and three assistant wardens. The president appoints the following committees; Fire hazards, Fire extinguishing equipment, Fire drill, Traffic safety and Playground equipment. There are several other committees that might be needed, depending on your local situation. These activities and committees, of course, must meet with approval of principal or person in

charge of operation of the school.

Fire Hazards Committee

Fire hazards can be found in many of our buildings. If these hazards are not detected and corrected they may cause serious accidents and great losses of school property. The committee in charge of fire hazards must be schooled in the ability to recognize fire hazards, have some knowledge as to how they can be eliminated and be prompt in reporting them to the proper authorities. The representative of the State Fire Marshal's Office will be glad to discuss all phases of school safety with the F.F.A. members. He can provide literature and suggest other publications which will prove very helpful in fire hazards detection and elimination. This committee makes regular inspections of all school buildings, a minimum of one check per month, and make report to proper school authorities as to their findings.

Extinguishing Equipment Committee

Schools are required to equip buildings with certain fire extinguishing facilities. This F.F.A. committee is responsible for checking all existing extinguishing equipment.
